What is JewelSwap?

JewelSwap is a decentralized application on Binance Smart Chain. Binance Smart Chain is like Ethereum but with lower gas costs. JewelSwap offers connections to yield farming, automatic market maker, Liquidity providing services, and more. JewelSwap uses Jewel Token as its native asset.

What is Jewel Token?

Jewel Token is a UFRC20 token standard. Compiled in the recently released Solidity 0.8.4 with no compiler warning. Jewel token maintains a list used to ban flash attack exploiters that have been troublesome on Ethereum and Binance Smart Chain.
